(54) Title: RELEASANT FOR AQUEOUS POLYMER-TYPE FLOOR POLISH

A releasing agent for removing a wasted film of an aqueous polymer-type floor polish is comprised of (A) a specified amount of a water-soluble organic solvent represented by the formula: C₄H₉-O-(CH₂CH₂O)_nH where n is an integer of 2 or 3, (B) a specified amount of benzyl alcohol and (C) a specified amount of an amine compound of a selected class. That releasant leads to (1) easy removal of an aqueous polymer-type floor polish film, (2) simple rinse with water, and (3) least use of a volatile organic compound, immunity from offensive small and safety offensive smell and safety.
